Cyber Liability Insurance Checklist

DO YOU QUALIFY?

Most cyber insurance providers **REQUIRE** these safeguards in order to qualify for insurance:

- Do you have commercial anti-virus protection implemented for all endpoints?
- Do you use multi-factor authentication to protect remote access, admin accounts and email?
- Do you provide ongoing security awareness training to all your employees?
- Do you back up all critical systems and servers?
- How do you track proof of cybersecurity compliance efforts?
- Do you have an effective plan for when a cyber incident occurs?
- Do you have scheduled tests that demonstrate network resilience?
